

Dr. Laura Bartoli, Ph.D.

Conservation Technologies Department, El.En. S.p.A., Italy

Dr. Bartoli graduated in Physics and earned her Ph.D. in Science for the Conservation for Cultural Heritage at the University of Florence, Italy. She started working as a researcher at the Institute for Applied Physics "N. Carrara" of the Italian National Council for Research mainly focusing her activity on the study of laser-matter interaction for the optimization of laser systems dedicated to the cleaning of Cultural Heritage. She is the author and co-author of many scientific papers dealing with laser and neutron techniques applied at the conservation of artworks. She is currently working in the Conservation Technologies Department of the El.En. S.p.A. Company in Calenzano (Florence) where she is in charge of the production for lasers dedicated to the cleaning of Cultural Heritage.
