Get your computer Stuart Weitzman School of Design ready with our "DESIGNIFY" checklist!

Sign up for our Designify sessions – We'll help get you completely ready for work at Design! We'll help you do the following on your computer:
 Get you connected to our network (wireless and ethernet) Review the process for installing our network printers Review any software required for your classes Scan for viruses/malware, check for software/hardware updates Review user accounts: standard+administrator (details below)
Things to check beforehand – Save time! Run a quick virus/malware scan. We can't Designify your machine if it's heavily infected.
Evaluation — Are you bringing an old computer? Or are you purchasing a new machine? Some things to consider if you want to use an older computer:
Is your machine under warranty?
 Can the specs of your machine support the current software Design uses? Is your machine at risk of hardware failure? (hard drive, corrupt OS, etc)
• Is your machine up to date? (OS, BIOS, hardware drivers)
Antivirus & Malware - Check your machine for viruses+malware
 Symantec Antivirus - Free antivirus software available through <u>UPenn's</u> website.
MalwareBytes - Free software to scan for malware/adware
If your computer is heavily infected with viruses or malware, refer to the
<u>Student Tech Center</u> for consultation and possible operating system reinstallation.
• <u>FortiClient</u> can also be used to run an initial scan.
Computer Accounts - Create standard and admin user accounts . (standard user vs. administrator)
UPenn Accounts - Verify you have PennKey, Design, and Email/Office 365
Accounts . Note: Your Design account will be created by us, and you will be notified via email once it's ready.
Two-Step Verification – All incoming students <u>must enroll in two-step</u> .
Design Password Reset - Enroll in Self-Service Password option.

Student Software – Examples of different software used for courses:
AutoDesk – Free for students, download from their website.
Microsoft Office 365 – Free for students, download available here. Can be
installed up to 5 computers.
Rhino 3D – This software is available in our PC labs however, we recommend
you buy a student license (to work from anywhere) for \$95, via Penn Computer
Connection.
Adobe Creative Cloud – Educational Licenses can be purchased from Adobe,
use your school email for the student rate. NOTE: Beginning FY 2020 – Students
will be required to sign up for a free Adobe Account. Read more here.
Networking and Connectivity
3
• Wireless Internet at Penn – Know how to connect to AirPennNet for laptop,
mobile devices. Know the difference between using wired vs. wireless.
• Ethernet Connectivity – Faster speeds+the only way to connect to Juno/Course
Folders
• Connect to Juno – student file server. \\juno.design.upenn.edu
Design\Username
DesignPassword
Remote Access – Accessing files and course folders off Penn's campus. More info
<u>here</u>
UPenn Data Storage Options – Free cloud backup and storage options
• LIDoop Day Storage (Unlimited storage)
UPenn Box Storage (Unlimited storage) Microsoft 0265 One Drive Storage (1TR of storage)
