**Position Available  
Posted June 10, 2019**

Building Conservation Associates, Inc. (BCA) seeks an Architectural Conservator to join the technical staff in our New York office. The Conservator will participate in a range of activities related to the assessment and treatment of historic resources, including historic research, field investigation, materials testing, report writing, preparation of construction documents, and project monitoring. Excellent communication skills are essential for this position. Demonstrable proficiency in AutoCAD is highly desirable.

Candidates for this position should have a graduate level degree in Historic Preservation with a concentration in materials conservation, or be able to provide documentation of equivalent experience; have a working knowledge about the conservation and treatment of a wide range of historic building materials; be comfortable working at heights in an outdoor environment; and have up to three years of professional experience. Salary commensurate with experience.

BCA is a private consulting firm specializing in historic preservation and architectural materials conservation. BCA provides consulting services to architects, private institutions, developers, building owners, museums, and government agencies. Building Conservation Associates, Inc. is an Equal Opportunity Employer.

Interested individuals should submit a letter of interest, current resume, and two short writing samples of sole authorship. Email materials to:
