Landscape Designer Positions

[wHY](#)

New York, NY, US

NYC & LA based wHY Landscape is seeking applications for landscape designers in the NYC office.

wHY is a 30-person Los Angeles and New York City-based firm known for architecture and urban planning projects that engage issues of culture and the environment with vision and pragmatism. Current projects include various public and private projects including international competition winning projects in Edinburgh and Toronto. The Landscape Designer will assist the Project Manager and project team with landscape architectural design development and construction drawings. He/she will develop landscape architectural details and construction documentation and will develop the skills necessary for a fast-paced landscape studio, including development of ideas, presentation drawings, model making and working with clients.

Required Skills and Experience

- Graduate/Enrollment in Professional degree program for Landscape Architecture
- Advanced AutoCAD, Rhino, Adobe Suite skills.
- Experience with design documentation and details
- Ability to work effectively in project teams
- Strong management and communication skills, a self-starter with an out-going personality

Application should include a cover letter, resume, portfolio, work examples and references. Please provide a detailed list of related experience. Please send PDF application to mark@why-site.com with subject heading wHY Landscape.
