

Viridian Landscape Studio is Hiring - Fall Internship

Founded in 1999 and located in Philadelphia PA, Viridian continues to hold true to the humble mission that sparked the firm genesis: to bridge ecological expertise with meaningful design to strengthen interconnection and harmony between social and built environments.

At Viridian we recognize that place-making is integral to the basic framework of society and understanding ecological systems is key to making place. We leverage those two ideas and with our clients, make beautiful, healing, enduring places. Our places give people meaningful ways in which to engage with the environment and each other – to play, learn and relax.

Every day, by way of our client's projects, we come together to infuse our work with science and art. We foster land stewardship leaders by sharing knowledge and encouraging freedom to research and innovate within the framework of Viridian's shared values, attention to detail and long-term strategies for successful sites.

Position: Design Intern for Fall 2019

Term: October 07 - December 13, 2019
