

Lasersystem CL 100-FFC

Mobile and easy to use

Our newest laser system is based on our successful low power CL 100 laser.

We added a OSH 20 optic and a special Fiber-Fiber-Coupling to the CL 100 laser source, making this laser the easiest to use and handle yet!

This system is air-cooled, runs on 110V, is very compact and nearly maintenance free.

The special beam profile makes the CL 100-FFC a perfect tool for mold cleaning, historic restoration or any other application where gentle cleaning is required.

Availability: 6 to 8 weeks

Technical data

Average laser power: 100 Watt

Laserclass: 4

Electrical requirement: 115 or 230V

Included:

- BulletpointCL 100 air cooled laser**
- Bulletpoint light weight housing on casters**
- Bulletpoint OSH 20 optic**
- Bulletpoint flat-top beam profile**
- Bulletpoint 30' high performance fiber**
- Bulletpoint 110V**

Optional:

- BulletpointPC**
- Bulletpoint 2-D scanning optic**
- Bulletpoint remote service access**
- Bulletpoint up to 150' fiber length**
